COURSE DESCRIPTION:
This course provides students with an overview that emphasizes the user's perspective in the analysis of information needs and preferences, including the fundamentals necessary for the study and understanding of human information-seeking behaviors of a variety of users and user groups.

COURSE OBJECTIVES
After the completion of this course, students will be able to:

1. Appreciate the basic philosophical and conceptual approaches to the study of information, information needs, information seeking, and information behavior;
2. Recognize a range of approaches to information needs and behavior assessment;
3. Appreciate how information behavior studies are done, using a range of technologies;
4. Review the current literature addressing information behaviors for various user populations.

COURSE MATERIALS:

COURSE ASSIGNMENTS AND EVALUATION:

Short Bios (2%)
Students will post a brief biography on the course website.
Weekly blog posts (48% total)
The weekly blog posts in this class have 2 primary purposes: (1) to encourage you to interact with each other and share your unique insights, examples, applications, and perspectives with each other; and (2) to give you the opportunity to work on the two major papers in this class in manageable parts.

Paper 1: Analyzing your own Information Behavior (25%)
The purpose of this assignment is for you to work to identify and analyze an information behavior; for you to apply the various information-related concepts from the course readings to that information behavior; for you to apply a model and a theory-or-paradigm systematically to that behavior; and for you to discuss how your view of that information behavior was different depending on which model/paradigm/theory you used to analyze it.

Paper 2: Researching a Population's Information Behavior (25%).
The purpose of this paper is for you to review the existing published research literature related to the information behaviors of a population of your choice; to analyze the published research literature for concepts, themes, and major research questions; and to use the research literature to inform the design of a research study.
